LeetCode: @avani-tripathi06

Professional Summary

B.Tech Computer Science student with strong foundation in Data Structures, Algorithms, Object-Oriented Programming, and Python. Hands-on experience in AI/ML and NLP through projects involving machine learning, TF-IDF, and Streamlit-based applications. Proficient in C++, Python, JavaScript, and problem solving with regular coding practice on LeetCode. Strong team player with leadership experience, adaptability, and a continuous learning mindset.

Skills

- **Languages:** C, C++, Python, JavaScript, SQL
- **Data Structures:** Array, String, Stack, Queue, Trees, Graphs and Linked List
- **Coursework:** Data Structures and Algorithms, Object Oriented Programming, DBMS, Operating System
- **AI/ML:** Machine Learning, Natural Language Processing, Text Classification, Feature Engineering, Model Evaluation, Supervised Learning
- **Soft Skills:** Teamwork, Leadership, Positivity, Patience and Flexibility

Education

- **Jabalpur Engineering College** — Jabalpur, MP
  Bachelor of Technology - 5th Semester Student (CGPA: 8.55/10)
- **Shravan Kumari School** — Rewa, MP
  Senior Secondary (PCM)
  (Percentage:90.08/100)
- **Shravan Kumari School** — Rewa, MP
  Secondary (10th)
  (Percentage:93.6/100)

Projects

- **RareSense — AI-Assisted Rare Disease Screening Platform (Ongoing)**
  Python, Streamlit, Scikit-learn, NLP, TF-IDF, spaCy, HPO, Orphadata, RareArena
  - Building an AI-assisted screening pipeline leveraging **TF-IDF feature engineering and SGD-based classification** to rank potential rare disease candidates from patient symptom descriptions and clinical narratives.
  - Integrated **Orphadata HPO phenotype associations** with a Streamlit healthcare workflow supporting symptom intake, follow-up questionnaires, report uploads, and patient assessment tracking.
- **Online Quiz and Score Evaluation System**
  Developed an online quiz system allowing users to attempt multiple choice questions.
  - Implemented automatic score calculation and result evaluation after submission
  - Strengthened logical thinking and conditional statement usage
  - Improved understanding of form handling and user input processing
  - Implemented validation mechanisms for better result accuracy
- **Student Placement System**
  Designed a placement portal to manage student placement information.
  - Student data entry and placement record management
  - Improved structured data handling understanding
  - Designed simple interface for maintaining records efficiently
  - Enhanced understanding of database connectivity and workflow
